

Dominion Energy will be working throughout Hardeeville city limits to trim tree lines that are within proximity of power lines. Although most work will be performed within the right-of-way, there may be a need to access private property to properly trim the trees. Dominion Energy has contracted this work to Gunnison Tree Service (GTS). GTS will have several trucks moving throughout the city to perform this work. In areas that permit it, GTS will use different equipment to conduct the work more efficiently.

Tree trimming operations will be noticed in the central part of the city, primarily bounded by Main St, Whyte Hardee Blvd, and I-95. The work will continue south along Hwy 17, Purrysburg Rd, and Kato Bay Rd in the northern part of the city.

Tree trimming will begin within the Car Moorers Acres neighborhood (see attached) and expand out from there. There will be traffic control in areas that require this.

Work is planned to begin on Friday December 1, 2023, and conclude in March 2024.

For any questions, comments, or concerns, please contact Public Works at 843-784-2231 or submit your concerns to Hardeeville Hears and Helps at:
